

# Educational Outreach

autism spectrum  
AUSTRALIA

Aspect's **Educational Outreach** is a specialist autism intervention team that offers a range of direct and indirect services to children, adolescents, families, schools, and to the broader community.

The philosophy of Aspect's Educational Outreach is based on collaborative partnerships with parents, schools, and other professionals.

Ongoing consultations are available to children who have an autism spectrum disorder (ASD) and who are enrolled in inclusive / mainstream educational settings within greater metropolitan Sydney. Educational Outreach also offers collaborative consultancy support for students enrolled in Support Classes and in Schools for Special Purposes (SSPs).

Collaborative specialist autism intervention services are provided on a subsidised fee-for-service basis. These include:

- **School consultancy** (e.g. positive behaviour support plans, learning support plans, playground/social intervention planning)
- **Group social skills programs** (for groups of between 6 and 12 children)
- **Social clubs** (for 8 – 18 year olds in age appropriate groups)
- **Individual programs** (e.g. diagnosis disclosure, social interventions)
- **Peer education programs** (e.g. Carol Gray's "*The Sixth Sense*" or "*Learn More About ASD*" - a peer information and training program)
- **Professional learning courses** (e.g. Introduction to ASD and Mainstream School Strategies, Asperger's Disorder and Adolescence)
- **School based in-service professional development for teachers** (programs to be negotiated to meet the needs of individual schools)
- **Customised training programs for parents and professionals**

Please contact Jane Cotter, Manager and Special Educator on 8868 8504 to discuss referral, training or other service options.
