

Welcome to the Autistic Community: A Welcome Pack

[Reframing Autism](#) has created a [Welcome Pack](#) that is freely available to newly diagnosed and self-identifying Autistic people. It provides information to assist Autistic adults in their everyday lives.

The Welcome Pack has been developed by a diverse group of Autistic adults. It is written through a neuro-affirming lens, where autism is seen as a difference rather than a deficit.

Tell us what you think

[The Aspect Research Centre for Autism Practice](#) is leading a research study to find out what Autistic people think about the Welcome Pack. This feedback will be used to help us improve the support offered to adults after receiving an autism diagnosis.

We're inviting adults who received a formal autism diagnosis in the last six months to take part in this study.

Participants will be asked to share their feedback and experiences in relation to the Welcome Pack during a 30–60 minute interview. The interview will be conducted via the participant's choice of Microsoft Teams, email or phone.

Take part in this study and receive a \$50 giftcard. Register now: redcap.link/WelcomePack
